

Applicant(s)  
Appl. No.

*a*  
*Concl'd*  
portion, the second housing portion enclosing the second lamp connectable in circuit with the battery for projecting a second light beam in a direction forming an angle with the longitudinal axis of the first housing portion; and

a support pivotally connected to the first housing portion and being pivotable between a closed position in which the support lies flat against the exterior surface of the first housing portion and an open position in which the support forms a stand extending from [an opposite side of] the first housing portion [from that of the first side of the first housing portion] for stabilizing the portable light source on a surface so that at least one of the first and second lamps can be directed toward a work area.

Please add the following new claim:

*A<sup>2</sup>*  
12. (New) The portable stand of claim 1, wherein the stand extends from an opposite side of the first housing portion from that of the first side of the first housing portion.

no underlining but amend in  
Amdt B to include underlining -
